Dear Dave Trudeau,

November 20, 2015

I wanted to take this opportunity to complement you on your company's product and the fact the CEO is the person that demonstrates how it works. I was introduced to your product at a *Workplace Violence/Active Shooter* seminar in Columbus, Ohio on September 6, 2015. I was very impressed as well as everyone in the room of the potential it offered to increase the safety and security of facilities. I immediately began informing others I knew throughout my contacts about the protective covering.

On November 18, 2015 I had another opportunity to see the protective covering demonstrated. I was among school administration, law enforcement officers, county facilities administrators, local companies and even a member of the local Federal Bureau of Investigations Office. Everyone was amazed of the abuse the window took. After the seminar many of us began to plan how we could do collaborate on getting it added to our facilities, especially the schools in Clermont County.

On November 19, 2015 you provided another opportunity to see the protective covering stop small arms fire among, local police chiefs, school administrators and myself. Again the product amazed everyone including the owner of the shooting range. The one thing that really stuck out in the minds of the chiefs was it could be applied to the police cruiser and then retrofitted to be switched to another cruiser when it is decommissioned. That just showed the longevity of the product.

I am an army veteran and served as a law enforcement officer for over 18 years. I served as a school resource officer and can see the true value the protective covering would add to protecting our children and staff. The most important thing that stood out to me and many others is the fact you were the one demonstrating and standing behind the product, not a salesman. Also the fact you would be willing to work with the schools and county entities on scheduling and cost.

As a county employee and a private business owner I thank you for your efforts to protect our valued assets which are our families and staff. Especially in an ever more increasing volatile world. I look forward to working with you in the near future to have the protective covering added to my facility along with collaborating with local entities to add it to their buildings.

If you have any questions or concerns, please do not hesitate to contact me.

Professionally,

James Taylor
Safety and Facilities Coordinator
