

Oct. 9, 2018

I was introduced to TruArmor's revolutionary bullet resistant car glass product and was immediately taken back at how light and thin the product is. It is significantly thinner and lighter than anything I have ever seen in all of my 25 years in law enforcement.

I have attended several demonstrations, where I was able to see first hand, it's ability to stop bullets from all calibers of handguns. I knew instantly that I was witnessing a true game-changer for law enforcement officers and citizens alike.

It is my understanding that this product can be easily installed in all makes and models of vehicles, and sold at a price more affordable than current means of bullet proofing vehicle windows. The usual means of bullet proofing requires vehicles to be heavily modified to support the additional glass weight.

We live in a statistically more dangerous society and in my opinion this glass can provide personal protection that the world has never seen before!

I am excited to install this glass in mine and my family's vehicles. I know we will be afforded greater protection and feel much safer than we do today.

Being exposed to senseless crimes, in my 25 years of law enforcement, I can recall many unfortunate instances that could have been prevented if this glass would have been installed in their vehicles.

I have spent my entire career protecting, and I am very happy to endorse this product and any product that keeps our community safer.

Thank you,

Sheriff Mike Neil

Monroe County Arkansas
